Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.

Art Unit: 1618

- (1) Field of the Invention.
- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).**
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Please include part (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-5 recite the limitation "anionic polymers", "it", and "polyuronic acid-containing polymer" in claim 1. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1618

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The 10th edition of the Merriam-Webster's Collegiate Dictionary (Merriam-Webster Incorporated: Springfield, Massachusetts, 1993, pp 311) defines "derivative" as, "a chemical substance related structurally to another substance and theoretically derivable from it." For example, carbon dioxide could theoretically be derived from the combustion of alginic acid. Therefore, the definition of derivative in the Merriam-Webster Collegiate Dictionary does not shed light on what Applicants' intended for the meaning of a alginic acid derivative or cellulose.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by BEISEL (CA 2383523).

Applicant's claims are directed to a composition comprising of: a swellable polymer, such as alginic acid; and a nutrient, such as vitamins.

Art Unit: 1618

BEISEL teaches a composition comprised of: a swellable polymer, such as alginic acid (see pg. 2, line 38-39); and a nutrient, such as vitamins (see pg. 7, line 3). Additional disclosure includes: producing satiation effect (see pg. 1, line 5).

Claims 1-5 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by SUGDEN (EP 0130771).

Applicant's claims are directed to a composition comprising of: a swellable polymer, such as alginic acid; and a pharmaceutical active compound, wherein the composition is in the form of a powder.

SUGDEN teaches a composition comprised of: a swellable polymer, such as sodium alginate (see pg. 7, line 6); and a pharmaceutical active compound, such as saccharin (see pg. 3, line 28), which is an active compound that triggers the release on insulin, wherein the composition is in the form of a powder (see pg. 2, line 27). Additional disclosure includes: treatment of satiety (see pg. 2, line 7).
